What to Consider When Choosing Your Speed

The more Internet connected devices you have, the more speed you need.

Take a look around and add up all your Internet connected devices including computers, tables, smartphones, smart home TV's, video game consoles, and streaming media players. When several devices are using your home's Internet connection simultaneously, they share the bandwidth. If your Internet plan isn't fast enough to handle this usage, you'll experience the annoyances of slow-loading webpages and buffering.

How you use the Internet has likely changed in recent years

Most households are now using their Internet connection for far more than just email or web surfing. For example, if you're enjoying the convenience and value of streaming entertainment, such as watching movies and TV shows via Netflix or Hulu, you'll need an Internet speed that's fast enough to accommodate this activity.
